

Integromat

Scenarios Primer

INTELASTEL TEMPLATES

A primer

To speed up your no-code application design, Intelastel offers a variety of pre-made templates

These provide you with a foundation for your own application - just pick a template and customise it to your needs

GET STARTED

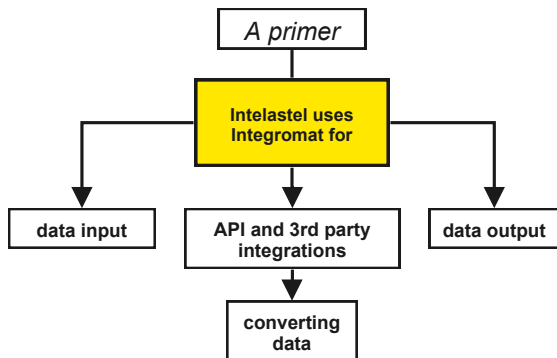

**PICK A
TEMPLATE**

Add your own branding

Add users

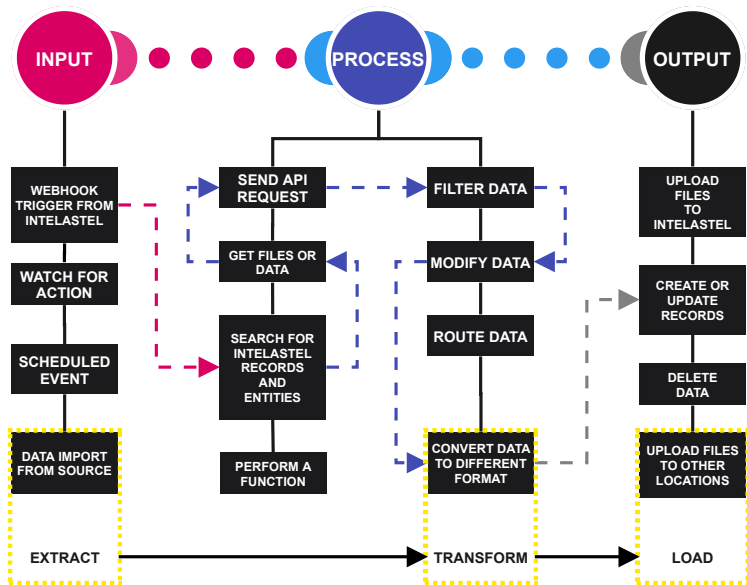

**Add Integromat scenarios
to import your data**

INTEGROMAT SCENARIOS

TO CREATE A SCENARIO

Just add, configure, and connect modules...

INTEGROMAT SCENARIOS

Searches

The following pages detail the Intelastel Integromat Search modules

Intelastel
Search for an entity value

This module searches an Intelastel Entity to find a record that matches a given value

Intelastel
Search for an entity value by ID

This module searches an Intelastel Entity to find a record that matches a record ID

Intelastel
Search for entities by App ID

This module searches an Intelastel Application for Entities

INTEGROMAT SCENARIOS

Search entity value

Use the Search modules to find records and entities

This module searches an Intelastel Entity to find a record that matches a given value

Intelastel Search for an entity value

Create or add a connection to your Intelastel account

Select the Intelastel Application to search

If you want to use a filter, enter or map the filter criteria

Set a limit to the number of records to return - you do not want it to return all your records, especially if they number in the thousands!

These can be mapped from other modules

INTEGROMAT SCENARIOS

Search entity value by ID

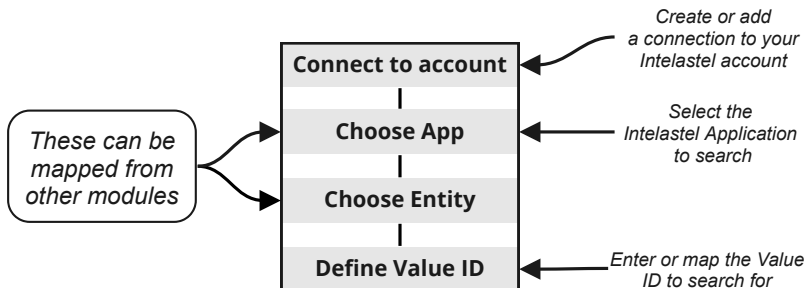

Use the Search modules to find records and entities

This module searches an Intelastel Entity to find a record that matches a record ID

Intelastel

Search for an entity value by ID

INTEGROMAT SCENARIOS

Search entity value by App ID

Use the Search modules
to find records and entities

This module searches
an Intelastel
Application for
Entities

Intelastel
Search for entities by App ID

This can be
mapped from
other modules

Connect to account

Choose App

Create or add
a connection to your
Intelastel account

Select the
Intelastel Application
to search

INTEGROMAT SCENARIOS

Create/Update/Delete entity values

**Use the Actions modules
to create, update and delete records**

**Intelastel
CreateEntityValue**

Use this
to add
new records
to an Entity

**Intelastel
UpdateEntityValue**

Use this to change
existing records in an
Entity

**Intelastel
DeleteEntityValue**

Use this to delete
existing records from
an Entity

*Create or add
a connection to your
Intelastel account*

*Select the
Intelastel Application
to use*

*Enter or map the Entity
to use*

*Enter or map
the attribute
to modify*

Connect to account

Choose App

Choose Entity

Choose attribute

*These can be
mapped from other
modules*

**Press OK to save the module
configuration**

Specific Features

The following pages cover the basics for some specific features

These are suggestions for common scenarios - to help familiarise yourself with Integromat when developing features using Intelastel templates

Creating PDFs

Sending Emails

Creating QR Codes

Sending Push Notifications

Google Form Update

API Requests via HTTP

KEY

Mandatory

Optional

Configuration

Optional Configuration

- - - - -> Description

.....> Data flow

————> Process flow

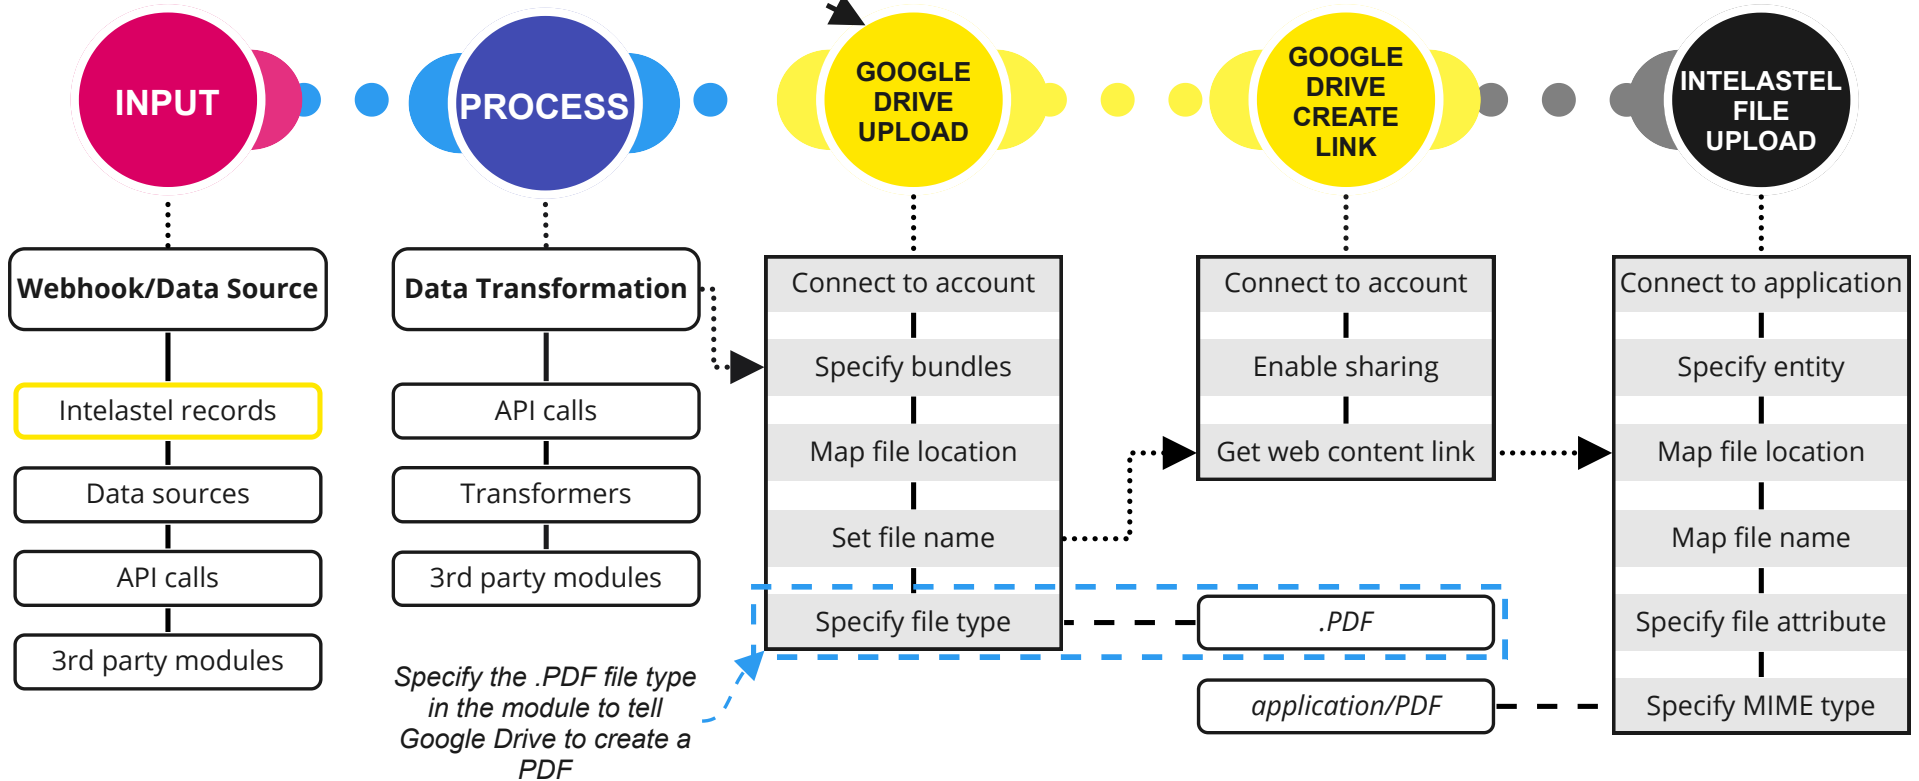

{ } Optional section

INTEGROMAT SCENARIOS

Creating PDFs

ADD - CONFIGURE - CONNECT

Google Drive upload creates PDF files for you

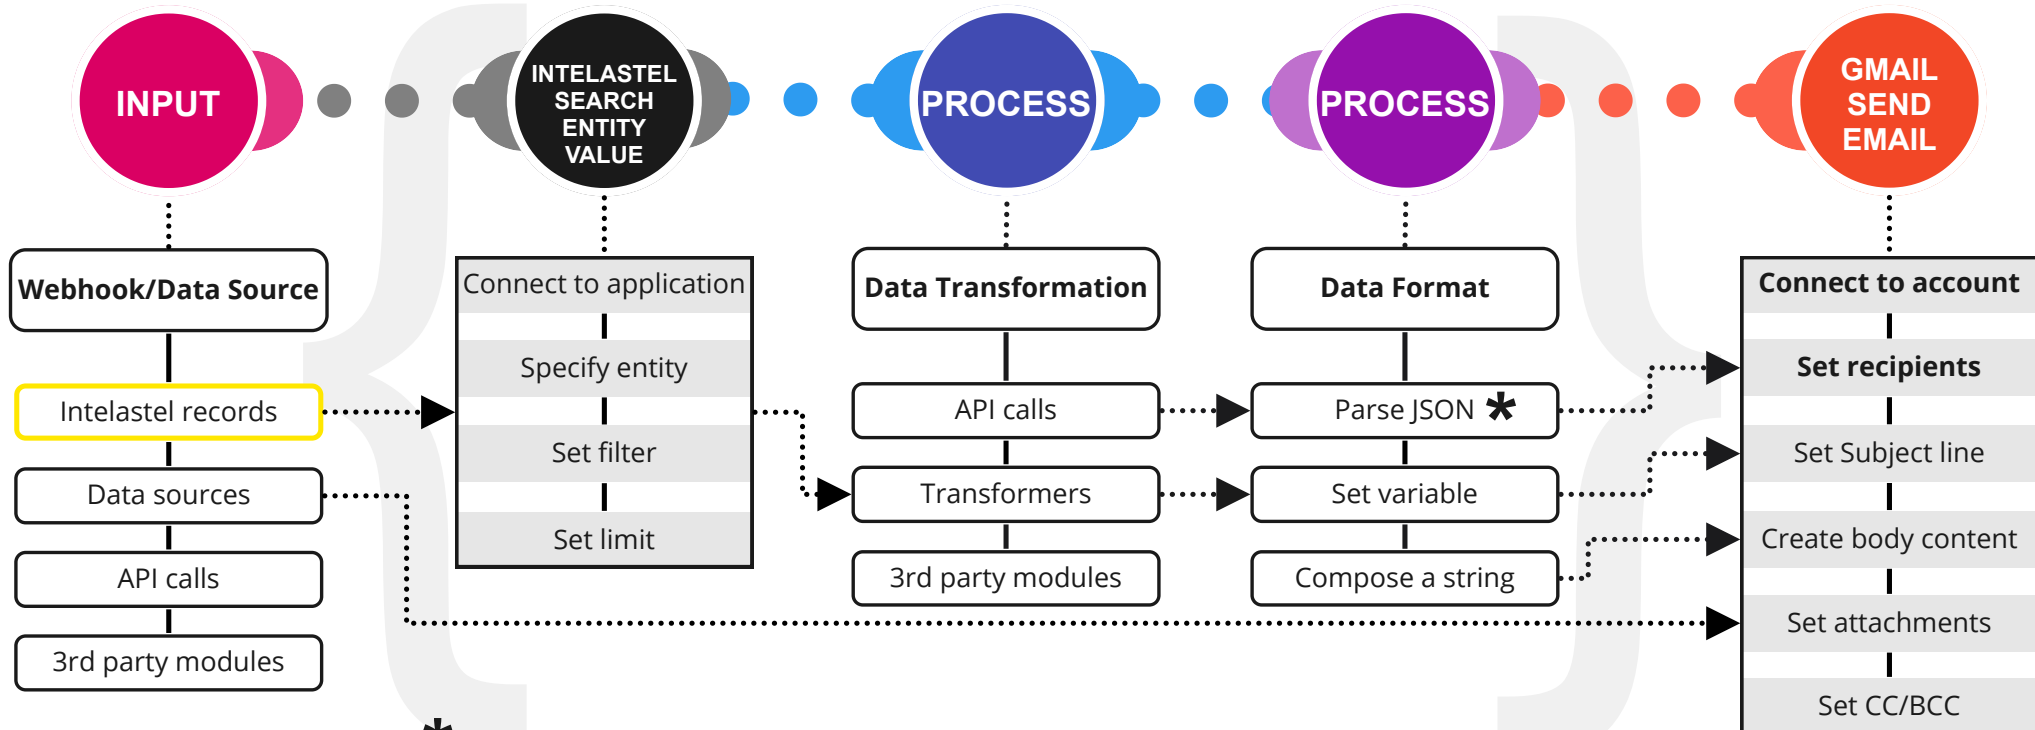

INTEGROMAT SCENARIOS

Sending Emails

Once your Gmail connection is added this is a very simple scenario - only the **INPUT** and **GMAIL SEND EMAIL** modules are required

ADD - CONFIGURE - CONNECT

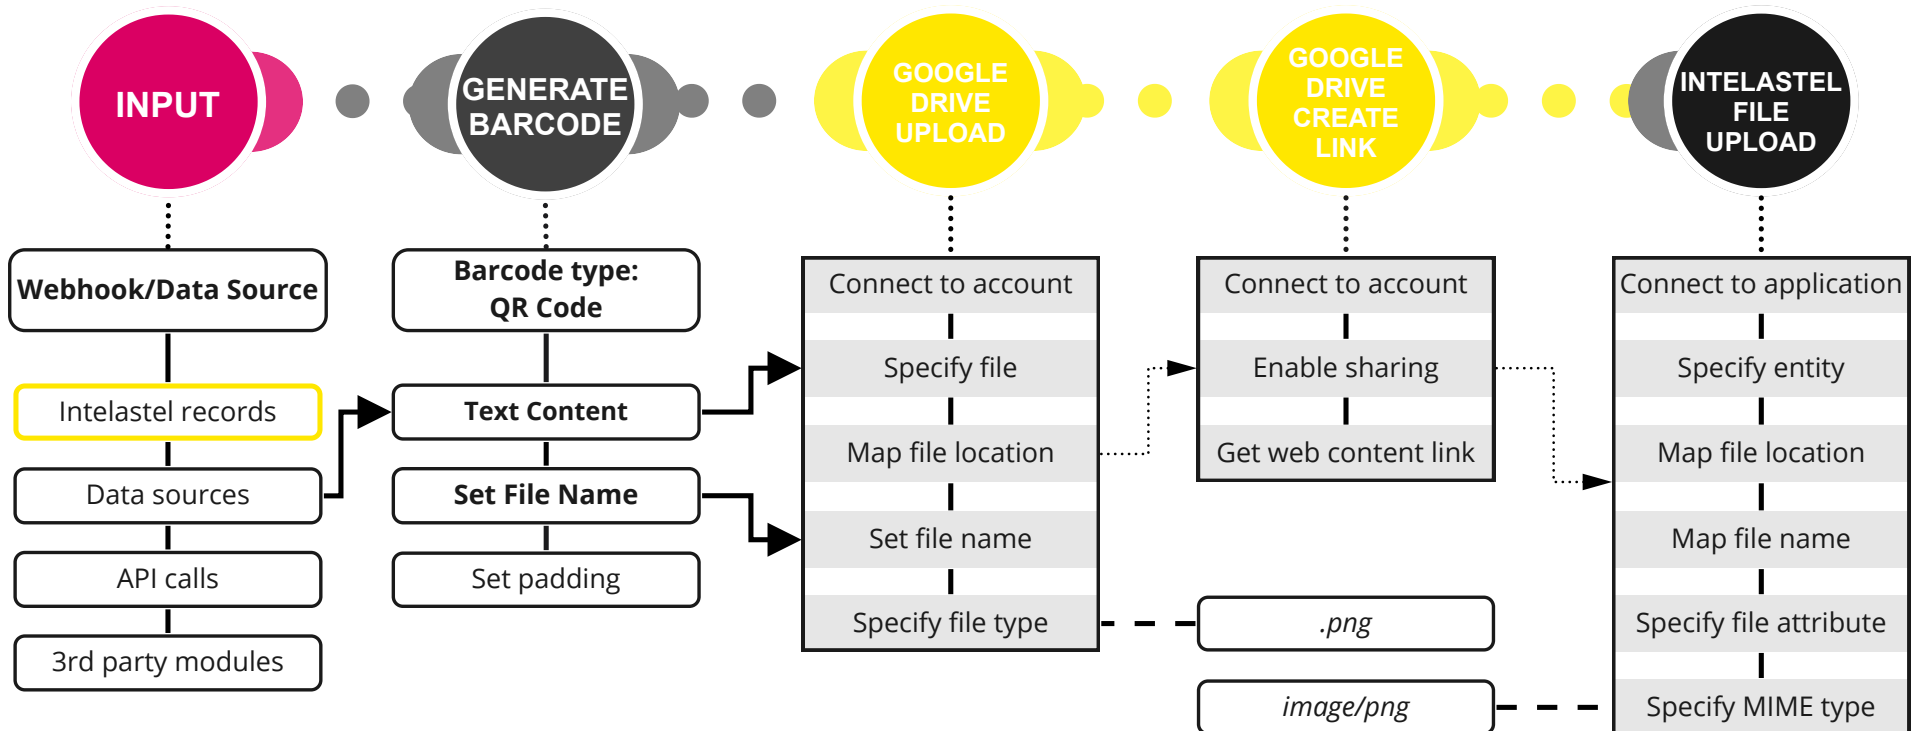

* *JSON is a human-readable data format commonly used to pass data from API requests
See our API guide for more information*

INTEGROMAT SCENARIOS

Creating QR Codes

ADD - CONFIGURE - CONNECT

INTEGROMAT SCENARIOS

ADVANCED

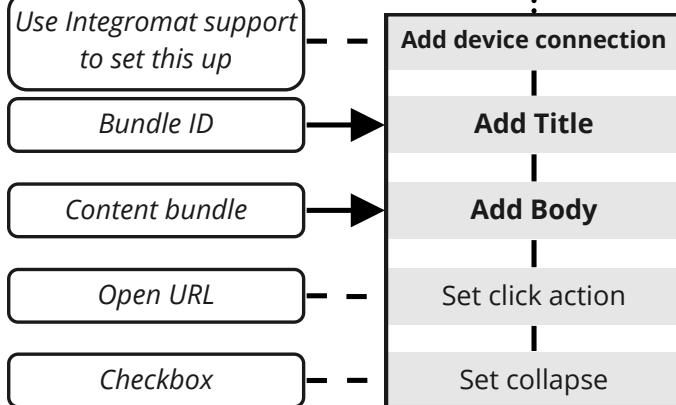

Sending Push Notifications

ANDROID

APPLE

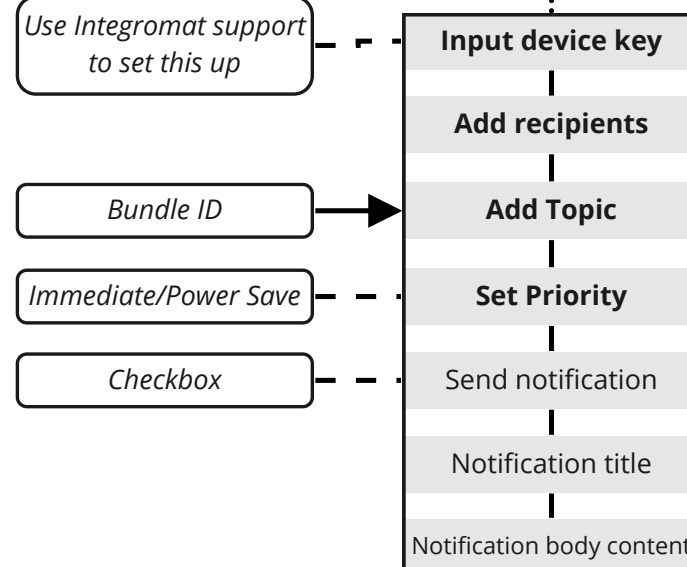

ANDROID
SEND PUSH NOTIFICATION

You'll need to install and sign in to the Integromat app on your Android device first

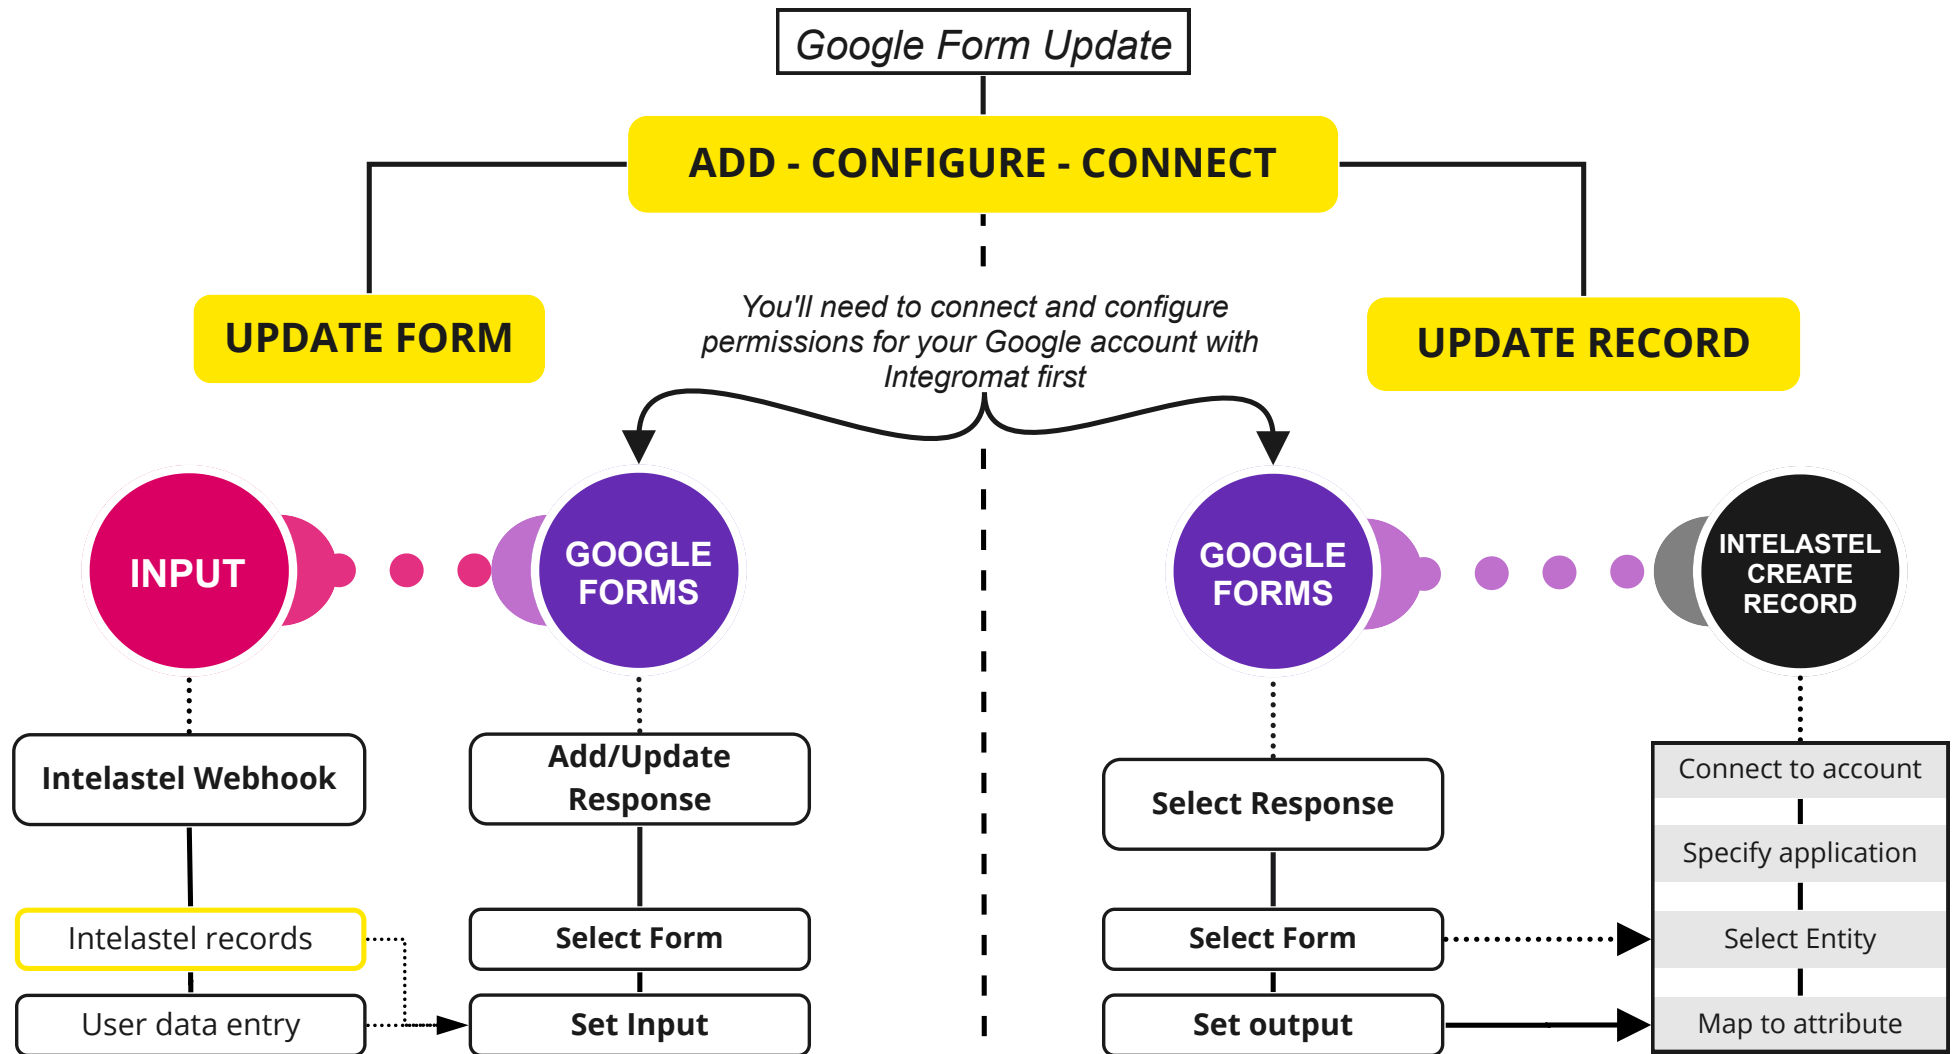

APPLE
PUSH NOTIFICATION

You'll need to set up and register your Apple device/s in your Integromat account first

INTEGROMAT SCENARIOS

INTEGROMAT SCENARIOS

ADVANCED

API Requests via HTTP

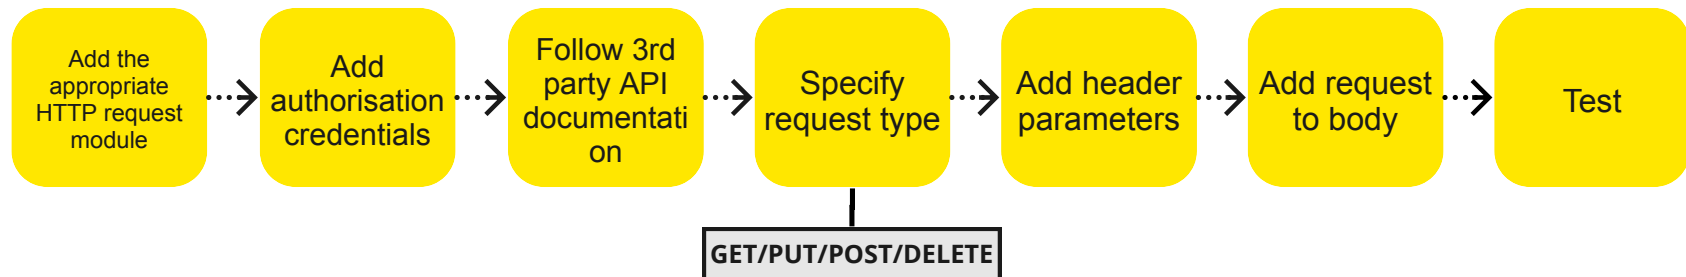

HTTP Requests to third party APIs

Many third-party application functions are already available to you as Integromat modules. There may be situations where you need a specific function and none of the preset modules are suitable. The HTTP request modules will allow you to create API calls.

HTTP

Make a request
